

Ghazenfer Mansoor

Ghazenfer Mansoor is the CEO of Technology Rivers, a software development firm specializing in AI-powered solutions, SaaS product development, and healthcare technology. He helps startups and service-based businesses streamline operations, automate processes, and scale through smart, efficient software. Ghazenfer is also the author of *Beyond the Download: How to Build Mobile Apps That People Love, Use, and Share Every Day*. He shares insights on innovation, growth strategy, and building technology that drives real impact.

AI-Driven Development

AI Agents, Automation, Vibe Coding, AI-Powered Design and Development

How startups can use AI, automation, and “vibe coding” to build investor-ready products 10x faster.

Session Titles:

- *Build 10X Faster: How AI-Driven Development Is Changing the Rules*
- *Vibe Coding: The New Way to Build Software at Startup Speed*
- *From Idea to Prototype in Days: AI Tools Every Founder Should Know*
- *Proof-of-Concept in a Weekend: AI-Powered Prototyping That Wins Investors*
- *Your Competitive Edge: Using AI to Outbuild and Outlearn the Competition*

Key Takeaways:

1. Learn how AI enables startups to build 10x faster, from idea to prototype, while reducing time, costs, and risks.
2. Discover the most impactful AI-driven coding and prototyping tools that help founders validate ideas and create investor-ready proofs of concept.
3. Understand how to leverage AI to outbuild, outlearn, and outperform the competition in today's fast-moving markets.
4. Walk away with a practical framework for integrating AI into your startup's product roadmap to scale efficiently and sustainably.
